

EchoControl Painted Panels

Echo Control Series

APPLICATIONS

Boardrooms | Houses of Worship | Schools | Theaters

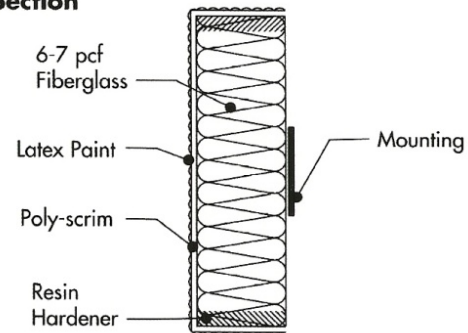

Perform Acoustics' Echo Control Painted (EC-PP) wall or ceiling panels are designed to be painted with your choice of colors to match or contrast with other painted finishes.

EC-PP panels have a compound core of 6-7 PCF fiberglass with a paintable scrim fiber facing sheet. The fiberglass core absorbs the sound. The scrim fiber sheet allows for an evenly painted finish.

Echo Control Painted wall panels are painted on the face and edges for a completely finished appearance. Ceiling panels are painted on the face, foiled-backed, and have exposed edges. Echo Control ceiling panels provide excellent sound absorption.

Echo Control Painted panels are ideal for areas in which the acoustical panels must "blend in" with the background. Two panel thicknesses are offered, allowing for the best sounding solution.

Core Section

MECHANICAL SPECIFICATIONS

Core: Facing: Scrim fiber. Backing: eco-friendly 6-7 PCF fiberglass, 1/2" to 4" thick

- Formaldehyde and Phenol Free
- GREENGUARD Children & School Certified
- GREENGUARD Certified
- 30% Post-Consumer Recycled Content

Sizes: Custom sizes and shapes up to 4' x 12'

Edges: Square, chemically hardened

Finishes: Sherwin Williams Latex paint

Mounting: Adhesive, impaling clips, two-part Z-clips

Flammability: All components have a Class "A" rating per ASTM E84
