

Room Tuner Mid-Bass Absorb Panels

Room Tuner Series

APPLICATIONS

Band Rooms | Performance Halls | Houses of Worship

Perform Acoustics' RT-MBA Panels are excellent midbass-frequency sound-absorbing panels. RT-MBA panels are covered in your choice of fabrics and may be used in conjunction with our other fabric-covered, sound-absorbing panels. Our RT-MBA panels are designed for areas that require sound absorption in the low-to-middle frequencies while preserving higher-frequency sound. Used in combination with our EC, DC, and other RT Series panels, a room can be optimized in terms of room decay for speech and music simultaneously.

MECHANICAL SPECIFICATIONS

Core: Facing: Vinyl Bass Trap. Backing: eco-friendly 6-7 PCF fiberglass, 2" thick

- Formaldehyde and Phenol Free
